

**Educational workshop on the topic:
“Prospects for the Development of Short Food Supply Chains in
Rural Areas of Georgia”**

Date: 09.06.2026

Time: 11:00

**Venue: Georgian Technical University, Agricultural sciences and chemical
technology faculty, room 212**

We are pleased to invite you to an educational workshop on the topic:
“Prospects for the Development of Short Food Supply Chains in Rural Areas of
Georgia”

The event is organized by Georgian Technical University with the aim of promoting modern
approaches in agriculture, facilitating knowledge exchange, and exploring opportunities for the
development of Short Food Supply Chains (SFSCs) in Georgia.

About project:

Small family farms play a vital role in ensuring food security and supporting rural economic
development. However, under current market conditions, they often face significant challenges,
including long global supply chains, limited market access, and reduced profit margins.

Within the framework of the workshop, participants will discuss the prospects for the
development of Short Food Supply Chains in rural areas of Georgia, their role in strengthening
local production systems, improving the economic sustainability of family farms, and fostering
direct relationships between producers and consumers.

The workshop will present both international and local experiences, successful case studies, and
innovative approaches.

The event will be led by representatives of Georgian Technical University and invited experts:

Prof. Nino Chkhartishvili

Dr. Maka Kochauri, Translator
